OSF Saint Francis Medical Center policy mandates that all immunization history be current and up-to-date PRIOR to placement as a volunteer.

Before we call you for an interview, you will need to provide documentation of immunization records for:

- MMR (1 dose or titer results)
- Varicella (1 dose or titer results)
- Tdap (within the last 10 years)

Immunization records can be obtained at your physician’s office, health department, or the high school/college you had and/or currently attending.

If you have any questions or difficulty obtaining these records, please contact Volunteer Services at 309-655-2118 to discuss. Thank you!
