

Capability	
<b>Capability</b>	<b>Medical Surge</b>
<b>Capability Definition</b>	The Medical surge capability is the ability to provide adequate medical evaluation and care during incidents that exceed the limits of the normal medical infrastructure within the community. This encompasses the ability of healthcare organizations to survive an all-hazards incident, and maintain or rapidly recover operations that were compromised

<b>Capability 10 - Medical Surge</b>	
<b>Function 1</b>	
<b>Function</b>	<b>1. The Healthcare Coalition assists with the coordination of the healthcare organization response during incidents that require medical surge</b>
<b>Function Description</b>	Develop, refine, and sustain processes to ensure incident management decisions during medical surge incidents are coordinated through multi-agency collaboration representative of the community healthcare organizations' priorities and needs. Coordination is achieved by ensuring that there are plans and protocols in place to guide the decisions made by incident management. It may also be achieved through real time multi-agency coordination by healthcare organizations during a response.

**Capability 10 - Medical Surge**  
**Function 4**

<b>Function</b>	<b>4. Develop Crisis Standards of Care guidance</b>
<b>Function Description</b>	<p>Provide State guidance and protocols on crisis standards of care in order to enable a substantial change in routine healthcare operations including delivery of the optimal level of patient care for a pervasive (e.g. pandemic influenza) or catastrophic (e.g. earthquake, hurricane) disaster. The need for crisis standards is justified by specific circumstances and may or may not be triggered by the formal declaration of emergency, disaster, or public health emergency (with input from local, Healthcare Coalition, and regional authorities), in recognition that crisis operations will be in effect for a sustained period. If an emergency declaration is made, it changes the legal environment and enables specific legal and regulatory powers and protections for public health and healthcare providers concerning their actions and omissions associated with allocating and utilizing scarce medical resources and implementing crisis standards of care. This guidance provides a delineated continuum of care from normal operations to eventual crisis standards of care. The continuum involves the scarcity of all other resource options until it is no longer feasible to provide normal care, including strategies to reduce demand, optimize existing resources, and augment existing resources.</p> <p>Note: Utilizing a crisis standard of care mode may not be optional—as it could be a forced choice based on the emerging situation. Under such circumstances, failing to make substantive adjustments to healthcare operations, that is; not to adopt crisis standards can result in increased morbidity and mortality</p>

Capability 10 - Medical Surge Function 5	
<b>Function</b>	<b>5. Provide assistance to healthcare organizations regarding evacuation and shelter in place operations</b>
<b>Function Description</b>	Support healthcare organizations during evacuation and shelter in place operations in which no warning or ample warning is received prior to the occurrence. This assists healthcare organizations with the safe and effective care of patients, equipment, and staff during relocation to another facility within a region or outside of the region in response to an incident. This includes the provision of assistance to healthcare organizations that have decided to shelter-in-place during the incident
