Registration Process

Advisement/Registration

Course Bundling:

Students will register by selecting a course bundle versus individual courses and sections. This greatly reduces scheduling conflicts for students. Course bundles (*see Course Bundle Charts*) have been created and contain all the necessary J1 courses and lab sections to enable a student to be enrolled full time or part time.

Academic Advisement:

- All incoming students will attend a group session, hosted by incoming student faculty advisors. A link for signing up for these sessions will be sent to the student's email address. There will be multiple sessions offered – the students must attend one. A description of the program and the upcoming semester and course bundle registration will occur at this time.
- In November/early December, the faculty will reach out to you to schedule an individual meeting to discuss individual learning, and study needs as well as to answer any questions that you have.
- Check prerequisites in the College Catalog or click on the College website <http://www.sfmcccon.edu>. While you can register before prerequisite courses are completed, you cannot attend class until an official transcript documenting completion and achievement of required GPA has been received.
- Students will not be registered for courses if they have delinquent financial obligations to the College or to financial aid programs.
- Class and clinical sections will be determined by registrations. The College reserves the right to limit enrollment in sections and to cancel a section for which there are insufficient registrations. The size of a clinical group is determined by limitations set by the clinical agency. **The College reserves the right to change or adjust course and clinical or lab schedules of students, as needed. You will be notified of changes to your schedule via email.**

FIRST SEMESTER, JUNIOR (J1) ENROLLMENT

Please refer to the College Catalog on www.sfmcon.edu for course descriptions.

FULL TIME STUDENTS

J1 - Full-time J1 students will be enrolled into one of the predefined full time course bundles (A2, A3, A4, B1 or B2). Each full-time course bundle contains a total of 17 credit hours and includes all of the J1 course lecture, lab and clinical requirements.
