

# Remote Patient Monitoring by OSF OnCall

Utilizing digital applications with flexible engagement options, our clinical remote patient monitoring team provides chronic disease management support 24/7/365 for patients with chronic conditions such as diabetes, COPD, heart failure, hypertension, asthma, dialysis and depression. Additional modules available per request.

Increased medication adherence

10,000+

people digitally monitored during the pandemic

Increased monitoring of home care patients with chronic diseases

Monitoring of blood pressure

Tracking inhaler utilization

## Specialized care

- Asthma – Monitors breathing with or without peak flow meter and tracks inhaler utilization
- COPD – Tracks breathing and vital signs to prevent worsening symptoms
- Depression – Tracks mood and depression symptoms by using PHQ-9 depression test questionnaire
- Diabetes – Monitors blood glucose levels and supply accessibility
- Dialysis – Monitors symptoms and tracks appointments and treatment adherence
- Heart failure – Monitors heart health through tracking of the breathing, edema, vital signs and weight
- Hypertension – Tracks blood pressure and hypo/hypersensitive symptomology

Assessing mood and depression symptoms
