

# Virtual Intensive Care by OSF OnCall

## 24/7 REMOTE CRITICAL CARE PATIENT MONITORING

### A PARTNERSHIP ALLOWING YOU TO FOCUS ON PATIENT CARE

Virtual Intensive Care by OSF OnCall combines the expertise and compassionate care of a team of highly skilled critical care physicians and nurses with digital technology to partner with hospital bedside teams in providing the highest level of care to ICU patients.

Our team focuses on evidence-based best practices and safe, quality care to provide excellent patient outcomes and a five-star experience.

Remotely monitors vital signs, clinical assessments, medications, lab results, imaging and more

**27%**  
Decrease in  
remote ICU  
length of stay

**20%**  
Decrease in  
average ICU  
mortality

**1.4**  
Decrease in  
number of days  
on a ventilator

Intervenes quickly with evaluation and treatment should an emergency occur

### Best Practice Initiatives

- Ventilator-acquired pneumonia prevention
- Ventilator management
- Delirium management and early mobility
- Glycemic control
- Sepsis management, including early detection and intervention
- Organ donation
- Acute respiratory distress syndrome (ARDS) and extracorporeal membrane oxygenation (ECMO) management

### Opportunities to Collaborate

- Patient admission, shift change
- Emergency arrest
- Communication orders
- Resident collaboration
- Specimen and medication verification
- Nursing education and mentoring
- Poison control
- Trouble shooting changes in condition
- Organ donation
- Arterial blood gas, vent bundle process and low tidal volume

Collaborates with the bedside care team to determine the ongoing plan of care for the patient
