Francis Medical Center](#)

Biography

Dr. Croland is from Peoria. His mother is a nurse, so he has been around health care providers practically his whole life. His reasoning for pursuing a medical career? He likes helping people, and caring for their health is a great way to do that.

He loves the overall happy feelings of the specialty and believes OSF HealthCare is the best health care system in the area, thanks to its wide range of specialists and sub-specialists. He makes it his priority to treat every patient as an individual who has unique needs.

"I like to make sure every patient receives a personalized experience," he said.

When he's not serving patients and their families with the greatest care and love, he likes traveling, taking in a movie, reading and spending time with his two children.
